Would you happen to have a We Care on this topic to be added into the RA's briefing package?

Thanks David!

Anything on SSM or is what we have still accurate and up-to-date?

- ◆ Status of the withdrawal publication of SSM SIP Call
 - 12/9/19 - We continue to evaluate all comments received and are preparing for final action as necessary briefings have been conducted. All comments received are available online in the docket for this action at [regulations.gov](https://www.regulations.gov). It would be not be appropriate to discuss any details of the anticipated final action. However we anticipate final action in the near future.

Thanks!

David, Tony:

Here is a fact sheet for the low RVP issue we understand TXOGA is asking about.

Subject: RA Talkers - TX Oil and Gas Association Meeting

Hi all,

Could yall provide some talkers/background info for the following topics? It's for the RA's talk at the Texas Oil and Gas Association Meeting next week. The red font text is the latest I have received about the topic.

Thanks!

A few topics that our members mentioned for RA McQueen to speak about:

- Status of the withdrawal publication of SSM SIP Call
 - 8/26/19 - We are evaluating all comments received and anticipate briefing senior management in September as we continue development of a final action. All comments received are available online in the docket for this action at regulations.gov. It would be not be appropriate to discuss any details of the anticipated final action. Due to the complex nature of the comments received, along with competing priorities and workload considerations, we are unable to provide an anticipated date of final action at this time.
- RVP Standards for counties— 10 day differential can be an issue with a hurricane
- Update on air monitoring via fly overs (I have an issue paper on this, any update?)
